# ORGANIZATION

## 3 phases:

1. Registration
2. Topic selection
3. Topic allocation

## Registration information:

<http://www.mi.uni-koeln.de/main/Schueler-innen/Lehre-Studium/Vorlesungsverzeichnis/Seminarplatzvergabe/index.php>

- Registration **required** between 08.07.2022 -13.07.2022

Send the „Formulare des Studienfachs“ form by mail to [visva.lehre@cs.uni-koeln.de](mailto:visva.lehre@cs.uni-koeln.de)

**In time registration required!**

## Blockseminar

- Not a weekly seminar. Find suitable dates via doodle.
- Workload still **180** hours. Most independent.

## Practical project

- Programming
- Designing
- Evaluating

## Deliverables

- Analysis of problem
- Development diary
- Final presentation
  - Live demo
- Code and documentation (including instruction)
- Data
- Results of evaluation

**Topic selection:** Will be done at the start of the winter semester.

Own topic allows if approved.

Start working on topic at the start of the semester.

- Topics here are pre-approved examples. You are welcome to propose your own topic
- Key criteria:
  - It has to be an applied topic: No literature study only
  - It has to be of an appropriate scope (ask for approval)
  - It has to be related to Visualization or Visual Analytics
- Feel free to email suggestions over the break
